FEEDING SUGGESTIONS

Weight of Dog	Standard 8 oz. measuring cup
3 - 5 lbs. _____	1/3 - 1/2 cup
5 - 15 lbs. _____	1/2 - 1 1/4 cup
15 - 30 lbs. _____	1 1/4 - 2 cups
30 - 50 lbs. _____	2 - 3 cups
50 - 75 lbs. _____	3 - 4 cups
75 - 100 lbs. _____	4 - 4 3/4 cups
Over 100 lbs. _____	4 3/4 plus 1/3 cup

for every 10 lbs over 100 lbs

These are only suggested amounts. The quantity of food your dog needs to maintain optimum nutrition depends on activity, age, disposition & environment. Increase feeding for pregnant females until they are receiving 50% more food during the last 3 weeks of pregnancy. Nursing females should be fed 2-3x more food than they would normally receive. Puppies require about twice as much as adult dogs & should be fed three to four times daily until six months old, then twice daily until nine months to one year old. When introducing a new food to your dog it is important to do so slowly. For the first few days, feed 10% of the new food mixed with 90% of the food the dog has been eating.

By introducing new food to your dog this way over several weeks you should be able to avoid any canine digestive upset.

Companion Dog Food is formulated to meet the nutritional levels established by the AAFCO Dog Food Nutrient Profiles for all life stages including growth of large size dogs (70 lbs. or more as an adult).

MADE IN U.S.A.

Manufactured for & Guaranteed By:
